## COMPANY OVERVIEW

ProclivIT is a mission focused and objective ready company specializing in providing technical and professional services to Federal, state and local government agencies and the private sector. ProclivIT was incorporated July 2019. The ProclivIT CEO, Beverly Beavers, is a retired United States Army Colonel who served as a Medical Service Corps officer for 28 1/2 years. A combat veteran who deployed to Iraq and Afghanistan, Bev also served in many senior leader positions to include Combat Developer and Information Systems Manager for the Directorate of Combat and Doctrine Development (DCDD), Battalion Command of the United States Army Medical Technology Center (USAMITC), CIO/G6 for the United States Army Surgeon General, and Division Chief for the Infrastructure, Operations and Sustainment (I&O) division of the Defense Health Agency J6. Bev has industry experience working with the Department of Veterans Affairs where she served as the Deputy Program Manager at Cerner, for the VA Electronic Health Record (EHR), Millenium, a 10 year IDIQ, and more than a 20+ billion dollar program. Additionally, Bev supported multiple Department of Defense clients when she was the Director for Military Health at ASM-Research, a subsidiary of Accenture Federal Services. ProclivIT team members provide quality support services including expertise in privilegedging and credentialing, and quality management utilizing lean six best practices. When warranted, Scaled Agile Framework SAFe processes are incorporated into supporting enterprise service management platforms continually exposed to the evolution of network complexities across many domains including change management, configuration management, data analytics, IT asset management, and application management. ProclivIT is a team always striving to find value for the clients that will yield continual improvements and innovation when creating end to end designs and establishing mission critical timelines for deployment operations which will also incorporate risk management planning, cybersecurity requirements, and ultimately deliver outstanding infrastructure operations and sustainment of networks.

Please reach out for more information on our services and federal contracting abilities.
